Dear Julie

In 2006 King's College contracted Vuksich & Borich Ltd as the main contractor to construct a sports facility to provide a synthetic 8 lane athletic track and a synthetic based water filled hockey turf.

This contract involved significant civil construction involving large excavations; back filling; re-routing and piping an existing storm water creek; installing many service ducts; and erecting special floodlighting poles.

As part of the project Vuksich & Borich Ltd had to prepare and provide surface levels and finishes to extremely accurate tolerances to enable their sub-contractor, Sports Technology NZ Ltd, to lay the various synthetic surfaces.

Vuksich & Borich Ltd successfully completed the contract within a very limited project time.

The facility has IAAF and FIH accreditation and subsequently Sports Technology NZ Ltd were awarded The Sports Contractor Association (SCA) of Australia and NZ "Sports Facility of the Year" for this project.

The complex was completed June 2007 and remains true and level without any maintenance issues.

I would have no hesitation working with Vuksich & Borich Ltd again.

Yours truly,

John Burnett
