IndexConvert Licences

When first downloaded an internal Software licence is applied which allows a user to convert up to 10 indexes, each with up to 100 entries subject to an overall maximum of 500 entries. 50 TextConvert and 50 CharConvert operations are also included. This supports initial familiarization.

A range of licences are available to match likely needs, ranging from low quantity reserve licences intended for casual users to high quantity 5 year licences for power users. These define an 'average' index size, quantity and an expiry date. The index size and quantity are multiplied and define a maximum number of paragraphs that can be processed in the period appropriate to the licence. TextConvert and CharConvert are available with licences for 10,000 entries or more.

	Licence Parameter	Description
a	Licence Period	3 year or 5 years for Standard licences 3 years for Reserve licences.
b	Metrics reset	Automatically every January for Standard licences. Not applicable for Reserve licences.
b	Index size	The size of an average index likely to be processed.
c	Index quantity	The maximum number of indexes permitted.
d	=b x c	The maximum number of entries (paragraphs) that can be processed in the licence period.
e	Expiry date	Expiry date is the 28th of a month with a 10 day safety margin.

Other licences are supplied by special request; these include short term licences for evaluation or training and reset licences that reset the usage metrics when loaded.

When choosing a 3 year or 5 year Standard licence it is recommended that you choose one rated at twice your expected annual usage.

Prices

Examples for converting an index with 10,000 paragraphs using information from the table below.
