

“The Solution Is Science®”

Formulating advanced chemistry and lubricant solutions for the metalworking industry. Products proven to improve manufacturing performance, part quality and cost savings!

STAMPING LUBRICANT

Consultant Lubricants, Inc

3139 Stamping Compound

Evaporative - Multi-Purpose - Dry Oil

- 1) Lubricant Evaporates** - 3139 dries to a clear, rust protective film.
- 2) Corrosion Protection** - 3139 Includes additives for corrosion protection and to prevent staining.
- 3) Ease of Application** - 3139 can be applied with rollers, sprayers, drip and /or immersion.
- 4) Operator Acceptance** - 3139 is low mist and low odor for health, safety and environmental support.

The 3139 multi-purpose vanishing lubricant providing high lubricity performance in applications where post process parts washing is not an option.

3139 performs well in such applications as Press Fitting, Punching, Blanking, Light Stamping, and many types of Forming. Following the operation, the 3139 dries almost completely leaving behind a clear, thin rust protective film. 3139 contains a unique additive to reduce misting which frequently occurs in high speed press operations.

This benefit along with the low odor gives 3139 a high degree of operator acceptance. It is a non-flammable product and can be applied with rollers, sprayers, drip, and immersion.

The 3139 will not stain metals and is specially treated to provide corrosion protection. Manufacturers can rely on the 3139 to perform exceptionally with the confidence that there are no chlorinated solvents or EPA hazardous components in the 3139. All additives are synthetic.
