

## Custom CIP Vessels Portable or Stationary Vessels Tailored to Your Precise Needs

Alloy Products Corp. custom crafts portable or stationary CIP vessels in a range of sizes up to 1135 liters (300 gallons) and with diameters from 229 to 1219 mm (9 to 48 inches). Your CIP pressure or atmospheric vessel can be customized to your exact requirements to include sight glasses, level controls, relief valves and more.

"We have complete control of the entire process here, because it's all done under one roof. We're not relying on other people to do part of our job for us. We're doing it all for the customer."
