**Subject:** Trestle Rehabilitation - Public Meeting

Dear Trestle Stakeholders,

The structure investigation and analysis phase is complete and the consulting engineer has developed scenarios which have been discussed in the draft conceptual design alternatives report. The alternatives will be presented for your questions and comments on Wednesday December 14 at 6pm at the Applebox Café, 224 B Street, right next to the Trestle. City staff, consultants and project materials will be available beginning at 5:30pm. The Applebox Café is staying open late for our meeting and will offer food and drink items for purchase.

Project materials are available at <http://cityofpetaluma.net/pubworks/engineering.html>

The second public meeting will take place at a City Council meeting, tentatively scheduled for January 23, 2012, and will incorporate comments from this December meeting.

Please contact me with questions or comments. See you soon!

**Diane**

City Hall is open Monday to Thursday
