

THE FULL EXTENT

AN INQUIRY INTO REALITY AND DESTINY

In the early 20th century, discoveries in quantum mechanics proved Consciousness is the ground of all being. This finding contradicted scientific materialism, which posited matter as foundational; instead, matter results from Mind. Moreover, Consciousness was antecedently linked to a First Mind, the universe a mental and spiritual construction of a Divine Being. *The Full Extent* expands on these quantum truths and considers their spiritual implications, positioning the human future.

Genre: Metaphysics, Spiritualism, Philosophy, Quantum Physics.
