

# The Metonic Cycle on the Dow Jones

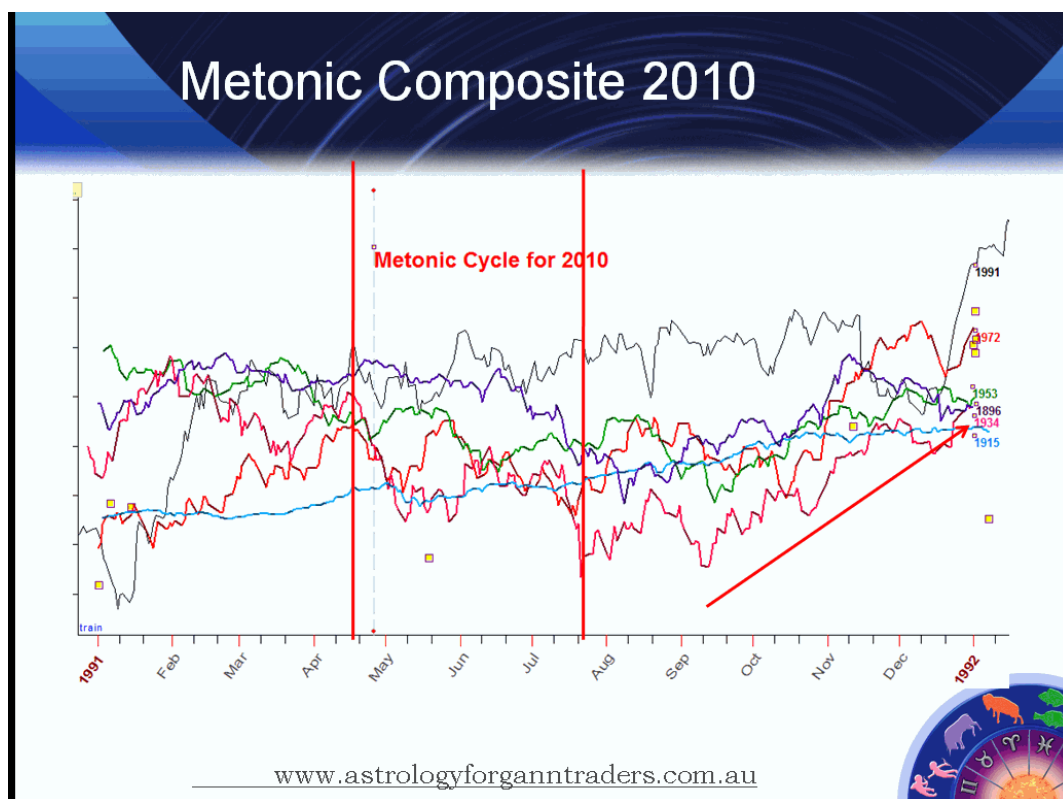

In Gann's novel "The Tunnel Thru the Air" he surreptitiously mentioned the Metonic cycle while speculating upon Major Motors 19<sup>th</sup> anniversary. I don't have access to historical major Major Motors data however I plotted the same years mentioned in TTTA using Dow data instead.

See chart 1

Using this technique, I was able to construct a composite of the Metonic Cycle with Dow date going back to 1896 using a Price Slice Tool in Timing Solution. (You can learn the exact method in my Lunar DVD part of the Intermediate Course.) You can see the composite of 6 Metonic cycles overlapping giving an overall shape for 2010. See Chart 2

Chart 2

Now that the year has completed, let's look at 2010 in Chart 3

YOU can learn the techniques and methods for yourself and have foreknowledge into the future based on statistical planetary analysis.

Part of the Intermediate Course, my lunar DVD reveals the power of the MOON and how you can use it to achieve a certain advantage like W.D. Gann.

I'm often asked what software I use to construct the composites – it is called Timing Solutions
