- Easy to use on mobile devices

The system has been created by a swimming pool business that has been established for over 50 years. When there was nothing that suited that business, we went and built our own.

Having experienced all of the management issues that can arise in running a complex business, we have come up with a system that gives you maximum flexibility for you to run the business the way you want to but with the structure needed to manage your staff efficiently and keep your clients happy and informed.

As mentioned, there isn't much that we haven't seen over the years and that includes the different ways that a pool business can be run. We feel that the flexibility of the BufferZone will allow you to run your business with the same methodology you have always done but with a new, streamlined approach.
