

October News

SEPTEMBER STEM

We have enjoyed tackling our STEM challenges this past month! For one challenge, students were tasked with making a boat out of craft sticks, sticky notes, toothpicks, wiki sticks, and tinfoil. Students experimented to see which items would make the strongest boat. After completing their design, students tested their boat's buoyancy in water. Students were then asked to stack pennies on their boat to test how much weight it would hold. Overall, students really enjoyed this challenge and are looking forward to improving their designs in the future!

OCTOBER'S FOCUS

This month we plan to focus on the changing of the season, fall themed STEM projects, and science experiments. Some activities that we will be doing this month include:

- Apple Engineering
- Science with Skittles
- Sink or Float M&M Science Experiment
- Erupting Fall Playdough
