

EXOSHIELD™

FOR THE FIRST 48 HOURS

DON'T SOAK IT.

Avoid car washes, driving in rain, or using wipers when possible.

LET IT DRY.

Expose ExoShield to the sun for the first few days to speed up curing.

GIVE IT TIME.

You might see some distortion initially. This disappears once ExoShield is cured.

Caring for EXOSHIELD

DOs...

- Keep wipers free of dirt and debris by cleaning regularly with a damp cloth.
- Hand wash with soap and water or use a touchless car wash.
- Only use approved coatings or surface treatments on ExoShield.

...and DON'Ts

- Don't pressure wash your windshield.
- Don't use ammonia-based glass cleaners or windshield washer fluids.
- Don't use metal, perforated, or rough plastic ice scrapers.
- Don't leave sap or droppings on ExoShield.
