

## **MAXIMIZE HEMP PRODUCTION WITH DRIP IRRIGATION AND PLASTIC MULCH**

Hemp is a versatile plant that can be grown and used in many industries such as textiles, food and beverage, construction and pharmaceuticals. Interest in Hemp production has increased with the 2018 passage of the Federal Farm Bill that made industrial hemp legal to grow as an agricultural commodity. Check your state for laws regarding Hemp production.

Maximize your Hemp production with the use of drip irrigation and plastic mulch. Drip irrigation will provide your plants with the water and nutrients required. Plastic mulch will help with weed control and moisture loss. We also carry layflat hose, fittings, filters, pressure regulators, valves and controllers to set up a complete system.

Call us. We can help design your irrigation system and supply you with the products needed to get you growing.
