SHOWER SOLUTIONS USA

by Alien Innovations, LLC

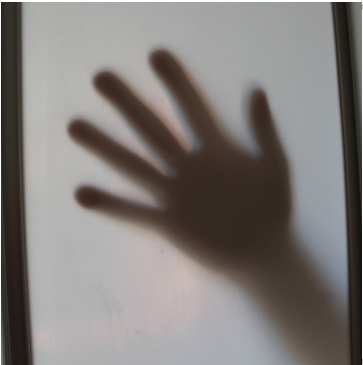

PRODUCT CATALOG

The MagnaFold shower door is a safer alternative to glass doors. Our plastic panels flex and do not shatter as glass may.

Flexible TPO plastic panels have a U shape when the door is in the open position, with a flat, smooth look in the closed position.

The translucent white panels allow some light to filter into the shower area, great for showers and tubs which may be dimly lit.

Flexible panels and rollers along the top and bottom track allow the door to collapse down to a fraction of the opening width. This is a great feature for RVs and showers where accessibility may be limited.

The MagnaFold Shower Door allows for ease of access into tubs as well. Here the door is approximately halfway open.

With the MagnaFold Shower Door fully collapsed and latched, there is plenty of room to get into and out of the shower or bathtub.

FEATURES

- Door panel constructed with flexible TPO plastic
- Full-length magnetic latching system
- Wide access to shower or bath area
- Spring-loaded roller system ensures smooth, quiet operation
- Ventilated for quicker, worry-free drying
- Most models available in single or double opening
- Translucent panels allow light to filter through with white tinting for privacy
- Aluminum frames available in Satin or Bright finish.
- White or other colored frames available at an additional cost.

Custom built to fit
your tub or shower

* Door opens from one side determined during installation.
All measurements are made in inches.
Door heights are made at every full inch from 55"-72".
To estimate walk through opening width, subtract width of collapsed door and frame from your opening width.
Other custom sizing options available. Please call for pricing.

The MagnaFold ELITE doors provide a more finished and complete look with an added level of privacy.

Our rigid PVC panels with flexible hinges create a V shape when folded and allow for tight collapsibility.

All of our panels fold inside of the tub or shower to contain any excess water within the tub or shower area.

Rollers along a top and bottom track along with two or four handles make the door easy to open and close from both the inside and the outside of the tub or shower.

Made with high quality aluminum framing and PVC panels, our doors are built to withstand countless uses with the proper care and cleaning.

The panels are a completely opaque white allowing for complete discreetness while in the shower or bathtub.

FEATURES

- Door panels made of rigid PVC with integrated flexible hinges
- Opaque panels for complete privacy
- Full-length magnetic latching system
- Wide access to shower or bath area
- Spring-loaded roller system ensures smooth, quiet operation
- Ventilated for quicker, worry-free drying
- Most models available in single or double opening
- Aluminum frames available in Satin or Bright finish
- White or other colored frames available at an additional cost.

The Barrier Free Folding Shower Door combines the MagnaFold ELITE shower door with the Barrier Free Shower Water Dam to create a seamless transition between shower and bathroom. The combination allows a wheel chair to enter the shower easily while still keeping water where it belongs, adding a level of accessibility to the shower without the worry of overflow.

Our Barrier Free Folding Shower Doors are used for both residential and commercial applications including schools and assisted living facilities.

Our Water Dam acts as the bottom track for the shower door to allow easy access with a low profile.

FEATURES

- Same features as the MagnaFold ELITE shower door (see page 5)
- Bottom track is the Barrier Free Shower Water Dam (see page 11)
- ADA Compliant
- Water Dam only available in Bright finish
- Only built for showers
- Beautiful, sleek appearance
- Most models available in single opening or double opening
- Fits showers from 25 inches to 73 inches

Custom built to fit
your shower

Made with our flexible MagnaFold ELITE shower panels, the Barrier Free Folding Shower Door provides ease of entry and complete privacy to offer a sleek and finished look with high functionality. Much more functional than a shower curtain, the water always stays inside the shower area.

Our Barrier Free Shower Water Dam is the best of its kind. Made with a high quality and durable aluminum rail in combination with a flexible and durable vinyl blade, the Water Dam provides an elegant and highly functional alternative to other Barrier Free options.

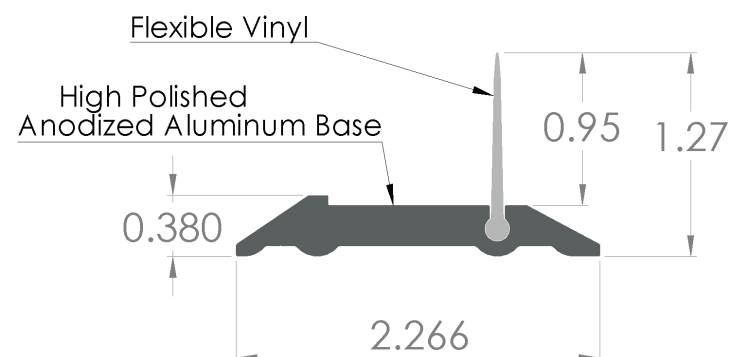

Our Water Dams are used in both residential and commercial applications including hotels, schools, hospitals and assisted living facilities.

The Barrier Free Shower Water Dam can be cut and mitered as shown to be functional for corner style showers as well.

The vinyl blade is durable, yet flexible enough to allow an object to roll over easily while still keeping the water inside the shower area.

Here is a diagram of the specifications of the Barrier Free Shower Water Dam as seen from the cut side to be used as verification for ADA accessibility. Measurements are made in inches.

FEATURES

- Allows wheelchairs and rolling shower chairs easy access to shower area
- Durable, flexible and soft poly-vinyl chloride water dam insert
- Highly polished and anodized heavy-duty aluminum base is extremely durable
- Easily cleaned with vinyl-safe cleaners
- Easily installed with high quality silicone caulk
- Most effective with the use of a weighted shower curtain or our Barrier Free Shower Door
- Compliant with ADA Section 608.7 and 303 (height requirement) (Rev. 9.15.2010)
- Can be cut/mitered to accomodate showers with two-sided openings
- Can be cut to fit your shower
- Replacement vinyl blades available
- Only available in Bright finish

If flooring or shower area is uneven, one or two screws may be used in addition to caulking to help secure the Water Dam. If screws are used, be sure to pre-drill holes in the center width of the aluminum base.

The high polished aluminum base of the Water Dam is exceptionally durable, but should be cleaned regularly to extend the lifetime of the product. We recommend cleaning once a month or more with natural, vinyl-safe cleaners.

The Water Dam comes in 3 lengths which can be easily measured and cut to fit your shower.

Part Number	Length
PRT35-3	3 ft (35-15/16")
PRT35-5	5 ft (60")
PRT35-6	6ft (72")
