Topic Information sheet

Railroad Saddle proposed action

The proposed action's release has been postponed until February or March to give the IDT more time to develop specific road and watershed restoration activities for the document. Forest Service hopes such details will give PFC and others more complete information upon which to base their comments. Forest Service will brief the PFC on next steps.

Funding for future collaborative support

The PFC Steering Team discussed future funding for PFC facilitation and administrative work at its January meeting. Funding for FY2022-23 has been secured through RAC. For following years it looks as if funding will be available through the infrastructure bill passed in November 2021.
