We are excited to offer our “Readmaster” Program to your child this summer. It is a computer-based reading program that stretches the speed and comprehension of growing readers. A tutor will be working one-on-one with your child, and each week you will receive an update on their progress. This is an excellent opportunity to keep your child’s reading skills fluent throughout the summer. No Readmaster on July 13–15.

Taekwondo is not only fun for kids, but also a great full-body exercise which increases strength, coordination and flexibility! Master Edgar Mosquera of Epic Martial Arts is a 6<sup>th</sup> degree black belt. Using age-appropriate games and drills, he will teach the children basic kicks, punches, blocks, forms, katas, stances, and board breaking. Using these skills, he will also be teaching character building. Respect is taught not by scaring

them into submission, which is often mistaken as respect, but actual respect. Respect for the knowledge and skill that the instructors can teach, for their friends that they spar with, and for the school that they attend. Self-discipline is taught by teaching children to wait their turn to make a comment or wait to talk to a friend, and to be able to listen to someone who is teaching them instead of rolling their eyes or wandering off.

All scheduling and payments will be done through Quentin Road, but if you have any questions regarding the lessons or your child's progress, you can email Edgar at [em0sq1979@gmail.com](mailto:em0sq1979@gmail.com). Absentees are not eligible for refunds. No class on June 25.

Parents are welcome to come see a special presentation on July 30.

**3:30-5:00pm**

Robotics for Kids uses fun, hands-on projects to get your child's creative juices flowing. Your child will learn how to build and program robots with LEGO® bricks and software – all while making friends, developing new skills and having a great time with STEM. Your child and a buddy work together to plan and build a new robot using LEGO® bricks, letting their creativity and imaginations loose. Along the way, they learn science and engineering concepts, such as how pulleys, levers and motors work. As the kids' robots take shape, they experiment with LEGO® Education's award-winning WeDo™ software. They discover how to apply computer programming concepts and find new ways to get their "bot" moving.
