

C-93

DESCRIPTION:

C-93 is a neutral powdered non-abrasive compound containing excellent water conditioning agents, synthetic cleaners and surfactants. It has been formulated to replace corrosive compounds for brightening or bleaching. It is also used to remove light rust, scale, or stains without requiring neutralization. Free rinsing; leaves no soap film.

TYPICAL APPLICATIONS:

C-93 is used to restore the natural color of metal after shutdown on abrasive media. It is also used to remove stains or light rust on steel. Excellent results in restoring the color to aluminum, brass or copper alloys. This compound is often used for short burnishing cycles where small media or steel balls are used.

OPERATING CONDITIONS:

VIBRATORY BATCH/OPEN MOUTH TUMBLING

CONCENTRATION: 2.0 - 3.0 oz./gal. (57-85 gr/ml)

TEMPERATURE: 50°F to 120°F (10-49 C)

ACIDITY: pH of the 2% solution is 7.5 - 8.0

For additional information such as physical characteristics, safety precautions, disposal, etc., see corresponding SDS.
