**Cosmic Superimposition:
How Are We Rooted in Nature?**

A Talk by Michael Mannion To Celebrate the Birthday of Wilhelm Reich

At the opening of *Cosmic Superimposition*, Wilhelm Reich asks "*In what manner is man rooted in Nature?*" To Reich, a cosmic primordial energy--which he called orgone--is the energy which governs the living and nonliving realms and roots us in Nature.

This cosmic primordial energy is the underlying unity in nature, the common functioning principle in the microscopic, macroscopic and cosmic realms. Human beings, and all living things, are specially organized energy systems. In *Cosmic Superimposition*, Reich followed the cosmic energy functions from human emotions to astrophysical processes, crossing the age-old barriers that have been erected separating the *bioenergetic* and *astrophysical* realms.

Reich was not understood in his day, but over the last 60 years, the flow of scientific development has been in the direction he pioneered. Join us for a fascination exploration of a new view of the universe and our place in it.
